

Infrastructure improvements and income tax cuts

Governor Snyder, within his January State of the State message, discussed a continued need to enhance Michigan's infrastructure. Many in the Legislature are discussing reductions in the income tax. Given the potential costs to the state coffers of either idea, coupled with the turnover in membership of the Michigan Legislature due to our restrictive legislative term limits, we are educating the 40 new legislators as to the existing tax burdens associated with a transaction. We remain consistent that infrastructure proposals should be paid for with some sort of nexus to the users of the service. We also volunteer that when tax revenues drop significantly, often the idea of expanding the sales tax base to further include services tends to surface. *Taxing of commissions and affiliated services around a transaction would devastate our Association membership.*

Short-term vacation rentals

Legislation is being introduced by a Realtor® member and State Representative Jason Sheppard. It will ban a local government's ability to ban short-term vacation rentals. It is becoming increasingly popular for local governmental units to entertain the idea of preventing short-term vacation rentals and then act adversely in this arena. *Rental rights are key to the value of one's property. Short-term property rentals are important to the culture of many communities around the state. We are heavily engaged in this debate.*

First-time homebuyer savings accounts

We are drafting legislation that will create a tax-free savings account for a first-time home purchase. It would work in the spirit of how one can currently save for educational expenses. Three other states have worked successfully on this issue. Given the student loan debt situation facing potential buyers in the coming years, this tool could help support our market long-term.

Property tax record data

Legislation was signed recently that allows for a better access at a reasonable cost structure in requesting quality electronic property tax record data from a County Treasurer. *We are working to see this concept be made applicable to townships and municipalities: Quality tax record data accessible at a reasonable cost.* Legislation will be introduced in the coming months.

Secondary mortgage market reforms

Expect proposals to surface in the coming year that could substantially change the government's role in the mortgage market. *NAR will be engaged to make sure that over the long-term in a stronger or challenged market that buyers have access to capital supporting our market and mortgage options for our clients.*

Federal tax reform

Realtors® will soon be seeing a sweeping tax reform proposal on the table in Congress. The tax code currently contains provisions that are important to and help incentivize the owning, buying, and selling of real property. Additionally, we will be reviewing the impact any changes would have to industry practitioners and their business. *We will be engaged in discussions with our elected officials as to what any changes to these provisions would mean to the market and dues paying members.*

Contributions are not deductible for Federal income tax purposes. RPAC contributions are voluntary and used for political purposes. You may refuse to contribute without reprisal or otherwise impacting your membership rights. For individuals investing \$1,000.00 or greater, up to 30% of this total investment may be forwarded to the National Association of REALTORS® RPAC. All amounts forwarded to the National Association of REALTORS® RPAC are charged against the applicable contribution limits under 52 U.S.C. 30016.
