

# Make every showing safer with Wearsafe

An instant call for help that makes it simple to reach the people you trust.

**50%**

of real estate agents meet prospective buyers for the first time when showing them a property.

**48%**

of female real estate agents have been afraid for their personal safety while working.

**46%**

of real estate brokers have standard procedures for agent safety.

## Agent Safety

While many real estate professionals feel unsafe, most don't carry anything with them as a safety precaution.

Instead, they choose to notify a spouse, friend or family member of their location. When agents do choose to carry a weapon, the most common types of self-defense weapons are: \*

taser, baton, or club **7%**

pepper spray **17%**

safety app **13%**

firearm **12%**

## Features

### On-scene Audio

Your trusted circle can hear what's happening as it happens — no need to guess what's wrong.

### Group Chat

The Wearsafe App becomes a virtual situation room where your friends can coordinate their response.

### Sends Location Only When Pressed

Your GPS coordinates are private and only tracked when you press the Tag.

### Wearsafe Rewind

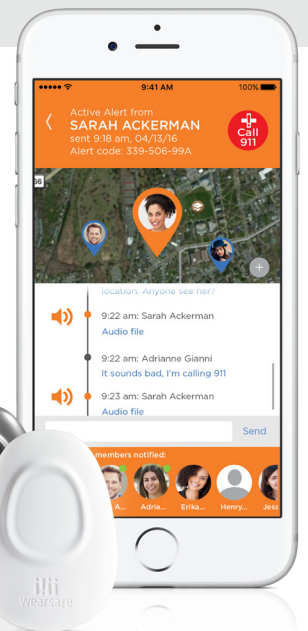

Captures what led up to the situation with audio from 60 seconds before you pressed the Tag.

### Easier to Activate

If you're hurt or in danger, you can't count on being able to find, unlock and dial your phone to call for help.

### Real-time Feedback

Wearsafe lets you know help is coming by vibrating each time someone gets your alert.

There is no time when communication is more critical than when you need help. Each day we hear about people whose lives are impacted because they couldn't get help when they needed it most.

Our founders, David and Phill, realized that too often people in distress are unable to use their phones and dedicated themselves to solving this problem. By collaborating with top security experts, designers, and engineers we created a peer-to-peer safety solution that fits the way we live today. The result is Wearsafe, giving you the ability to instantly connect and get help in real time.
